

DUAL COLOUR DIAMOND TEXTURED

Nitrile Powder-Free Glove

ProTecq

DUAL COLOUR, DUAL LAYER FOR DOUBLE PROTECTION IN JUST ONE DONNING

Diamond Textured Dual Colour Nitrile Powder-Free Glove

Dual Colour, Dual Layer Diamond Textured Studs Nitrile Glove is double dipped to provide a black exterior and a green interior. This allows for 2 comfortable layers of superior protection in just one donning.

When a glove has been compromised, the dual colour enables faster detection of glove breach to avoid contamination and protect the users. In addition, the glove is diamond textured to provide a secure grip in wet and slippery situation or when an enhanced firm grip is critical to handle the task at hand.

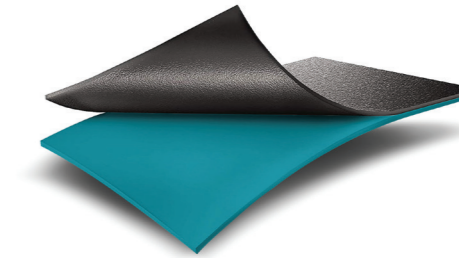

Features:

- Diamond textured studs on contact area
- Ambidextrous
- Standard beaded cuff
- Industrial standard
- Not made with natural rubber latex
- Powder-free
- Black exterior, Green interior
- Available in 6mil
- Chemical resistant nitrile

Benefits:

- Dual colours allow for early detection when glove barrier protection has been compromised to avoid contamination and putting users at risk.
- Provides 2 comfortable layers of protection with just one donning, without the challenges of uneven surfaces and discomfort compared to double gloved.
- Diamond textured studs provide a secure grip in wet and slippery situation or when an enhanced firm grip is critical for the task.
- Thick and heavy-duty against rip, tear and puncture.
- Excellent chemical resistance
- Tactile and comfortable for precision work.
- Save time and hassle with single donning vs double donning.
- Different inner and outer colours allow clear and easy identification of used gloves to prevent accidental glove reuse.

Two Layer Toughness
Black outer layer and green inner layer help identify puncture

Heavy Duty Nitrile Gloves
6 mil thickness for better rip, tear, puncture and chemical resistance

Premium Gloves
Protect your hands from grease, grime, dirt, oil, fuels, nicks, scrapes and more

Diamond Textured Studs

Cooler, drier hands: With diamond textured studs on the glove exterior and reversed texture interior, it allows better ventilation to keep the user's hand drier and more comfortable.

Less accumulation of liquid on glove: With the diamond textured studs, liquids are directed to flow away from the gloves, thus allowing better traction on contact surface.

Secure, firm grip: With 90 diamond studs per every 2x2cm area, the surface area provides traction for a secure grip to perform wet, slimy and slippery task.

Critical thumb contact area

Diamond textured studs on contact area including critical thumb surface.
